

AP AIR & LIQUID
INDUSTRIAL TRADING

Products Catalog

**Ensuring Smooth
Operations with Premium
Industrial Supplies.**

Based in the Philippines, AP Air & Liquid Industrial Trading is a dedicated provider of a wide range of industrial necessities. Our core offerings include reliable air compressors, advanced filtration solutions for air, oil, and liquids, a diverse selection of purification media, and a complete inventory of industrial tools, parts, and consumables.

We strive to be a dependable partner, delivering quality products that meet the diverse needs of industrial operations.

Atlas Copco Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Sullair Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Ingersoll Rand Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Donaldson Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Jemaco Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Beco Air Filter Elements

Available in various configuration
and Part Number.

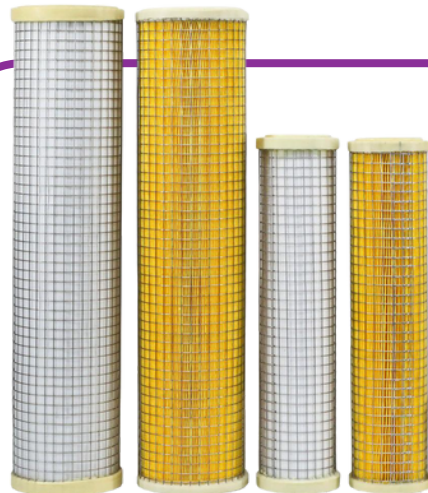

Replacement Parts

Hiross Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Parker Finite Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Orion Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

SMC Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

UltraFilter Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Boge Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Hankison Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Dominic Hunter Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Zander Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

ATS Air Filter Elements

Available in various configuration
and Part Number.

Replacement Parts

Atlas Copco Air Oil Separator

Available in various configuration
and Part Number.

Replacement Parts

Sullair Air Oil Separator

Available in various configuration
and Part Number.

Replacement Parts

Ingersoll Rand Air Oil Separator

Available in various configuration
and Part Number.

Replacement Parts

Kaeser Air Oil Separator

Available in various configuration
and Part Number.

Replacement Parts

Acid Washed Powder Activated Carbon

We supply cost-effective Activated Charcoal powder for various uses. Our acid-washed carbon ensures efficient food, water, beverage, and pharmaceutical purification.

[Inquire for Specs](#)

Unwashed Powder Activated Carbon

Effectively removes unwanted color, odor, and impurities due to its high microporosity. As a trusted Indian manufacturer, we produce this deodorizer and purifier under strict quality control.

[Inquire for Specs](#)

Granular Activated Carbon

With its larger particles, is ideal for gas and vapor absorption. It's used in water treatment, deodorization, and flow system separation.

[Inquire for Specs](#)

Extruded Activated Carbon

Offers exceptional absorption capacity for air and gas streams. It effectively removes contaminants like VOCs, ammonia, and mercury, ideal for vapor phase applications.

[Inquire for Specs](#)

Impregnated Activated Carbon

Enhances contaminant removal by introducing specific chemicals.

This process improves its performance for targeted air or water purification applications.

[Inquire for Specs](#)

Coconut Shell Activated Carbon

As a Philippine supplier, we offer premium coconut shell activated carbon—sustainable and efficient. Its micro-pore structure excels in water treatment, air purification, and gold recovery.

[Inquire for Specs](#)

Activated Carbon

Our high-grade activated carbon offers superior adsorption and retention. It's ideal for diverse applications, optimizing efficiency and performance.

[Inquire for Specs](#)

Anthracite Coal

We supply high-quality anthracite coal, ideal for various applications, from heating to water filtration. It's a clean-burning, efficient energy source with high carbon and low moisture.

[Inquire for Specs](#)

Ion Exchange Resin

We offer diverse Ion Exchange Resins for water treatment, ensuring compatibility and various performance grades. Our R&D team continually enhances products and maintains quality.

[Inquire for Specs](#)

Garnet

We source high-grade abrasive garnet for various applications like blast cleaning. It's a safe, durable, and cost-effective solution, also available in river and ocean grades.

[Inquire for Specs](#)

Manganese Dioxide

As a leading global supplier, we offer high-purity manganese dioxide for various applications. It's ideal for water purification and filtration, effectively removing iron and manganese due to its high catalytic activity.

[Inquire for Specs](#)

Activated Alumina Balls

We've added activated alumina spheres to our filtration solutions.

Their high adsorption and durability make them efficient for oil filtration, air dehydration, and fluoride removal.

[Inquire for Specs](#)

Ceramic Balls

We now offer ceramic spheres, a high-quality product with superior properties like stiffness and corrosion resistance. These are available in various ranges and at competitive prices for our global customers.

[Inquire for Specs](#)

Molecular Sieves

Molecular sieves (zeolites) efficiently dehydrate gases and liquids, surpassing other drying agents. Their precise pores ensure virtually anhydrous products, crucial for various industrial and lab applications.
